

TOSHIBA

Easily making GHS labels

Highlight Feature

- > Printing GHS* labels with color combination internally
- > BS5609 (Section Three) Certificated
- > No need to order preprinted labels in advance
- > No need to manage various preprinted labels
- ★ Globally Harmonized System of Classification and Labelling of Chemicals

Easily making GHS labels

Your Challenges

"We need to order various preprinted GHS labels that logos or caution signs were already printed in color, which is time consuming. Also, managing those inventories also needs time, money and spaces. It would be helpful if we could reduce the operation cost and time of making GHS labels while keeping the durability..."

Our Solution

Working with TESLIN*¹ labels, the Toshiba e-STUDIO3515AC/3005AC/2515AC can create durable GHS labels from scratch while keeping reliability of BS 5609 (Section Three)*². Since all designs including GHS pictogram*³ can be printed on blank labels, you do not need to order preprinted labels in advance, and managing inventory becomes easier.

Your benefits

Save time and cost on ordering preprinted labels and managing inventories

Easy to create designs of GHS labels with durability based on your needs by using BarTender*⁴ together

*1 TESLIN – a type of waterproof paper manufactured by PPG Industries, Inc.

*2 BS 5609 (Section Three) – a particular label applying to containers of chemicals for marine transportation use. When a particular material is tested with a specific printer, Section Three compliance will be granted. (The certified combination: TESLIN labels (SP700PR+TSP-1) and Toshiba MFPs)

*3 GHS pictogram – symbols with red diamond borders that shows hazard information

*4 BarTender – BarTender software transforms your business information into the labels, barcodes, and more.

Making GHS labels internally

- Need to order various preprinted labels in advance
- Hard to find labels
- Need many spaces to organize

No more labels...

Should I order new preprinted labels now? But I need to make this one immediately!

Besides preprinted parts, only monochrome printing is available...

- Only need to prepare blank labels
- Easy to find and organize
- Only occupy small spaces

No worries about lacking labels!

I can make label templates immediately!

You can design and print GHS labels with GHS Pictogram according to your needs now!
