

Form & Label Printing

Highlight Feature

- > All shipping related documents are produced by one machine
- > Form and label papers are on one double-sided paper with seal and perforation
- > Saving time of managing different documents and machines
- > Organizing documents on one sheet of paper makes work more efficient
- > Showing color printing advertisements is possible

Your Challenges

When dealing with shipping items, we follow a complicated labeling process, which easily causes the problem of mixing papers.

Since the packing process involves various forms, such as invoices, return labels and delivery slips, more than one printing machines are required. Hence, it also takes time to manage those machines.

If there is a way to enhance the entire workflow, that would be helpful...

Our Solution

The Toshiba e-STUDIO5015AC/5005AC/400AC Series is able to print various shipping related forms on one special form & label paper which is a double-sided paper with seal and perforation, so plastic bags for shipping forms are no longer needed any more. The overall picking process can be done efficiently and correctly.

In addition, since the entire process is done by one machine, time of managing machines in your daily work is saved.
