

SOTI CONNECT

BUSINESS-CRITICAL PRINTING MEETS BUSINESS-CRITICAL PRINTER MANAGEMENT

The age of the “Internet of Things” (IoT) is here and devices are becoming smarter and more connected. Enterprises are increasingly relying on IoT-enabled devices, like industrial and mobile printers, to improve their operational efficiency, safety and customer experience. The connected printers now allow organizations to easily manage and maintain their printer fleet, and gather invaluable data and insights around their industrial and mobile printer operations.

More connected devices mean additional management complexities. Unexpected maintenance costs and downtime can turn printers from a revenue driver into a costly problem. SOTI Connect, an IoT management solution, is built for the enterprise and provides complete lifecycle management of heavy duty industrial, desktop and mobile printers within an organization, lowering the total cost of ownership (TCO) of their labeling operations and improving the return on investment (ROI) of their IoT initiatives.

PRINTER MANAGEMENT MADE EASY

SOTI Connect provides complete lifecycle management of select Toshiba printers. Its highly flexible, data-driven architecture means new printers are quickly supported and managed, reducing deployment time for IoT initiatives. SOTI Connect delivers on what matters: increased reliability of an organization's printer fleet and the quality of the materials being printed.

- Setup and configure fleets of Toshiba printers and make it easy to support post-deployment with little effort.
- Apply maintenance or full version releases with remote firmware updates that fix bugs, patch vulnerabilities or enable brand new capabilities instantly.
- Setup alerts to monitor for printer behavior and receive automatic notifications when behavior is outside of normal configurations.

MANAGE ALL PRINTER TYPES, SHAPES AND SIZES

Toshiba offers a wide range of barcode printers that are all designed for the ultimate user experience, with easy operation and the flexibility to operate in the most diverse working environments. From entry level to industrial, Toshiba printers deliver outstanding performance in business-critical processes. This makes them the perfect solution for businesses that put an emphasis on reliability and robustness, day after day.

This makes it easy to integrate Toshiba into SOTI Connect and existing applications.

- User-friendly interface, charts and dashboards provide real-time views of printer information and health.
- Reduce maintenance, repair and resource costs by remotely adjusting printer settings and instantly performing device actions on a single or a group of printers.
- Utilize automation rules to remedy issues by setting pre-defined conditions and preconfigured actions when those conditions are met.

WHAT SOTI CONNECT CAN DO FOR YOUR BUSINESS

MANAGE YOUR BUSINESS-CRITICAL INDUSTRIAL AND MOBILE PRINTERS

SOTI Connect addresses key printer management challenges with remote support features that reduce device downtime and workflow disruptions.

- Remote access enables instant installation of firmware updates.
- Remote printer configurations and settings adjustments ensure print consistency and quality across a fleet of printers.
- Remote support features provide access to printer endpoints and allow organizations to perform actions to troubleshoot and remediate issues.
- Automation rules automatically issue alerts and actions when pre-defined conditions are met.
- Advanced data collection provides around the clock analysis of valuable printer status information to ensure printers perform reliably.

TOSHIBA PRINTERS MANAGED BY SOTI CONNECT

TOSHIBA B-FP2D

Starting with the B-FP2D, Toshiba barcode printers now support SOTI Connect. Small and light, easy to handle, the B-FP2D was designed with the user in mind. Simple to operate with a full colour graphical LCD display and easily visible status updates. It features drop-in, large capacity media loading for quick and efficient media changes and a double tear-off bar for operator flexibility.

TECHNICAL SPECIFICATIONS

TOSHIBA B-FP2D FEATURES:

- High Throughput With Up To 6 ips
- Robust & Ergonomic Design
- Compact & Lightweight
- Ease Of Use
- Rapid Boot Time
- Noticeable Color LCD
- Consumable Parts Alert
- Intelligent Battery Monitoring
- Easy Media Loading
- Cutter & Peel-Off Support
- USB Type C Charging
- Cradle Charger Support
- Multi-Print Language Emulation

CONNECTIVITY:

- USB 2.0 Full Speed (USB-C)
- Bluetooth (Supported V2.1 + EDR)
- Wireless LAN (IEEE 802.11 a/b/g/n) Support
- NFC for Bluetooth Pairing

SOTI ONE SIMPLIFIES YOUR BUSINESS MOBILITY AND IoT

The **SOTI ONE Platform** is an integrated suite of solutions designed to reduce the cost, complexity and downtime related to business-critical mobility and IoT. Comprised of six revolutionary products, the SOTI ONE Platform helps businesses remove functional silos, eliminate downtime, build apps faster, manage all mobile and IoT devices in one place and deliver actionable insights. When everything is connected, the SOTI ONE Platform makes mobile and IoT business operations simpler, smarter and more reliable.

ABOUT TOSHIBA:

The Toshiba Tec Group aims to be a company that can continually provide the best solutions to customers, which include the retail, food and beverage industries, as well as logistics, manufacturing industries and offices. We conduct business operations in over 100 countries and regions.

TOGETHER INFORMATION is Toshiba's vision for how people and organizations create, record, share, manage and display ideas and data. It is based on our belief that the most successful organizations are those that communicate information in the most effective way. We make that possible through an integrated portfolio of industry-specific solutions, all of which reflect Toshiba's commitment to the future of the planet.

Toshiba Tec Group aims to provide timely products and services with reliable quality and functions as well as high user-friendliness, creating value with our customer in mind through our superior proprietary technology and in collaboration with the world's best partners.
