Toshiba POS Terminal

ST-F20

Compact, stylish and robust POS terminal featuring easy operation

The Toshiba ST-F20 is a highly-refined POS terminal that is drip-proof and dust-proof, with a quiet fan-less design. It has been developed for many types of retail operations and environments.

Toshiba POS Terminal

ST-F20

A touch display makes the ST-F20 exceptionally easy to operate

The bright, easy-to-read display is operated by touch, making it as easy to use as a smartphone. In addition, the edge-to-edge all glass front makes it drip- and dust-proof, and makes cleaning a snap.

Stylish and compact design achieved by combining the main unit with the display

The ST-F20 has a compact design due to combining the main unit and display. Two colors, black and white, are available to match the decor and atmosphere of your shop.

Durable, quiet, fan-less design

The fan-less design greatly reduces the openings that can allow dust and smoke to enter the unit and lead to failure. With no rotary fan noise, this unit is ideal for quiet environments.

In addition to the high performance CPU, a choice between HDD and SSD is available

A high-performance CPU and large memory, up to 8 GB, are combined to provide excellent performance and smooth operation. For mass storage you can choose between HDD and SSD.

Other key features:

A dual-screen configuration is available, to suit your shop's environment.

The tilt-able display can be angled up to 90 degrees for easy viewing.

Various options such as customer displays and card readers are available.

15" TFT 2nd display
