## <u>Caution</u>

**NOTE:**       **For restoring the divided files, save the following files in the same folder of HDD.**

         **Ex) When a version is V001.xxx**
**ST-M30OPOSV1xxx.000**
**ST-M30OPOSV1xxx.001**
**ST-M30OPOSV1xxx.002**
**ST-M30OPOSV1xxx.003**
**.**
**.**
**.**
**ST-M30OPOSV1xxx.bat**

**Execution of "ST-M30OPOSV1xxx.bat" restores "ST-M30OPOSV1xxx.zip" to the same location as "ST-M30OPOSV1xxx.bat"**

**NOTE1:**     **For WEPOS, the installer might have problem for "Upgrade". Please perform un-installation for older installer and perform installation with newer version of installer.**

**NOTE2:**     **The un-installation might have problem to remove the device driver. If happen, please remove the device driver from Device Manager manually.**
**<Start> → <Run> → type "devmgmt.msc" and press "Enter"**
**Right clicks the TEC device to be uninstall and select "Uninstall"**
**Please make sure that the device will not be use anymore.**

**NOTE3:**     **Make sure system is fresh boot-up (not running any OPOS application) before performing any upgrade installation or un-installation.**
